

Dear [Name],

We are thrilled to announce that Blaze Audio's PowerZone™ Connect amplifiers, equipped with Audinate Dante™ technology, are now available - and on stock. Dante™ is easy to integrate, easy to install, easy to use, and enables system installers to efficiently manage an audio system over a standard Ethernet network.

George Tennet, Vice President, Global Sales and Marketing at Blaze Audio, shares: *"We are excited to introduce Dante integration to a selection of our PowerZone Connect series. Audinate holds a prominent position as an industry leader and the preferred supplier for audio networking solutions. The incorporation of their Dante Ultimo chip into our amplifiers underscores our commitment to empowering system installers with the advanced tools necessary to create exceptional, high-quality audio experiences"*.

Blaze Audio's Audinate Dante™-enabled amplifiers include:

- **PowerZone™ Connect 122D** (125W | 2CH)
- **PowerZone™ Connect 504D** (500W | 4CH)
- **PowerZone™ Connect 2004D** (2000W | 4CH)
- **PowerZone™ Connect 3004D** (3000W | 4CH)

All Dante™-enabled models come with the latest 1.5.0 firmware, providing Dante™ compatibility plus all-new DSP features to all models in the PowerZone™ Connect series. including:

- Audinate Dante™ compatibility (exclusive to 122D/504D/2004D/3004D)
- Automatic closure of all TCP connections during reboot
- Routing of mix to SPDIF/Dante™
- VU meters for output routing on SPDIF/Dante™
- Timeout for locating on amplifier (2min)
- Power-on mode, allowing sleep/wake functionality via output channels monitoring.
