

BLAZE

Designed as a short to medium throw loudspeaker, the CBL528 is ideally suited for a wide range of fixed installations.

Featuring a compact form factor that minimizes both transportation and line-of-sight considerations. With its bi-amped design for system integration with Blaze Audio amplifiers, it makes an excellent choice for permanent installations such as sports arenas, conference centers, performing arts venues, and houses of worship.

With its wide 180° horizontal and 45° vertical dispersion, this loudspeaker supports a frequency range from 54 Hz to 18 kHz, ensuring clear, natural-sounding music and highly articulate speech reproduction.

Equally important, the CBL528's symmetrical dispersion pattern ensures that listeners hear consistent sound, regardless of whether they are positioned in front of, to the left, or to the right of the loudspeaker.
