

FOR IMMEDIATE RELEASE

## **Blaze Audio announces Audinate Dante™ equipped versions of its PowerZone™ Connect amplifiers.**

[Denmark, September 27] - Blaze Audio, a global provider of pro audio solutions tailored for the commercial and leisure install markets, continues to solidify its position with the announcement of Audinate Dante™ AoIP compatibility across its acclaimed PowerZone™ Connect amplifier series, now catering to the sophisticated demands of networked audio systems that require up to 4x4 channels at a sample rate of 44.1 and 48kHz.

George Tennet, Vice President of Sales and Marketing at Blaze Audio, shares: *"We are thrilled to introduce Dante integration to an initial selection of our PowerZone Connect series. Audinate stands tall as the industry leader and preferred supplier for media networking solutions, and the incorporation of their Dante Ultimo chip into our amps emphasizes our commitment to empowering system installers with the advanced tools necessary to craft exceptional, high-quality audio experiences while efficiently managing multiple units over a standard Ethernet network."*

Blaze Audio's Audinate Dante™-equipped amplifiers are now available for purchase through Blaze Audio's extensive global partner network. Models include:

- PowerZone™ Connect 122D (125 W | 2 CH)
- PowerZone™ Connect 504D (500 W | 4 CH)
- PowerZone™ Connect 2004D (2000 W | 4 CH)
- PowerZone™ Connect 3004D (3000 W | 4 CH)

For further information on local availability, please contact your local Blaze Audio partner at:
